

## PLEASE NOTE:

### **LEGAL NOTE - Intellectual Property**

The Hippo Water Roller embodies intellectual property that is proprietary to the Hippo Water Roller Project. No copying or modifications to the roller is permitted without the consent of Hippo Water Roller Project.

### **Maintenance-Free Design**

When new, there may be some minor leaking from the screw cap. Do not be alarmed – this is NOT a manufacturing fault.

There is no rubber seal on the screw cap, because rubber perishes quickly causing major leaks. The cap has been designed to 'wear in' with time and use; this minor leaking will reduce as the Hippo Water Roller is used.

### **Instructions**

Please refer to the instruction sheet – in pictures – to learn how to use and care for the Hippo Water Roller in order to maximize its lifespan.

### **Enquiries**

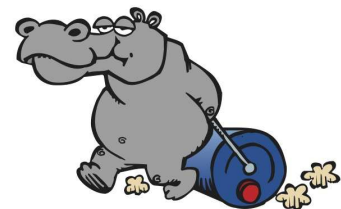

Please contact us with any queries:
